

ONE STOP SHOP FOR CONNECTED VEHICLE DATA

Otonomo (Nasdaq:OTMO) fuels a data ecosystem of OEMs, fleets and more than 100 service providers. Our platform securely ingests more than 4 billion data points per day from over 40 million global connected vehicles, then reshapes and enriches it, to accelerate time to market for new services that improve the in-and-around the car experience.

Privacy by design and neutrality are at the core of our platform, which enables GDPR, CCPA, and other privacy-regulation-compliant solutions using both personal and aggregate data. Use cases include emergency services, traffic management, mapping, EV management, subscription-based services, parking, predictive maintenance, insurance, media, in-vehicle services, and dozens of smart city solutions.
